

## Color Selections Guidelines

Selection of colors for Cheval homes, including roofs, house body paint, house trim paint, and door color and type are limited to select combinations. Books of the allowable color selections are available at the property manager's office during normal business hours.

In addition, this site contains the list of allowed combinations of body paint colors, trim paint colors, door colors and Biarritz colors.

If you wish, you may use the list of allowed colors for your existing roof color. **If you use this list, you MUST verify the colors with the paint manufacturer. The colors included in these documents are only approximations, and may not be true colors.**

You may still view the complete sample books in the property manager's office. Please contact the property manager to view sample books.

In addition, you may pick up a paper copy of the color selection guidelines from the property manager's office.

Please read the following three documents:

1. Read this general instruction document first.
2. Read the instructions relative to door colors.
3. Find the list of allowed colors for your existing roof color. Use the color combinations as a guide, but check with the paint manufacturer for specific color chips.

Please also note that you are not restricted to using the specific manufacturer whose color is listed. You may take your selected color chip (sample) to the manufacturer of your choice, as long as it matches the color to the approved selection.

**You still must apply to the Architectural Landscape Review Committee (ALRC) for approval, even if you use an approved color scheme.**
